CHI151 Mercury/Mercurous Sulfate Reference Electrode

Introduction

Hg₂SO₄ + 2e = 2Hg + SO₄²⁻

Note:
1. Please remove cap before first time use.
2. If there is air bubbles trapped in the chamber, please swing the electrode body to remove air bubbles.
3. If the solution inside the electrode is below the liquid level shown above, please fill saturated K₂SO₄ solution.
4. After use, please dip the electrode into saturated K₂SO₄ solution.
